## SUMMARY

I'm a Wellington-born Computer Science and Software Engineering graduate from the University of Otago, currently based in Dunedin. I'm practical, reliable, and keen to keep learning. I enjoy building things, working in a team, and taking responsibility when a problem needs someone to own it. Since starting computing in 2023, I've become interested in a wide range of areas, especially software development, networking and security, AI, web development and cryptography.

## SKILLS

### Programming

Python, Java, C#, SQL, JavaScript, HTML, CSS, C, Lua

### Networking & Security

Routers, firewalls, TCP/IP, NAT, security protocols, network management

### Tools

Git, Linux, Docker, AWS, Roblox Studio

### Working Style

Agile development, project management, team leadership, bug triage, open to feedback and willing to learn

## EXPERIENCE

### Game Programmer | Splitting Point Studios

Nov 2025 - Jul 2026

- Worked mainly on Grow a Garden and helped build, test, and maintain live-game features for a very large Roblox player base.
- Programmed in Luau across client and server systems, with a focus on clean gameplay behaviour and reliable player-facing updates.
- Used development, staging/testing, and live production workflows so changes could be checked properly before reaching players.
- Worked with community testers and live player feedback to reproduce bugs, narrow down causes, and get fixes ready for release.
- Contributed to games from a studio portfolio with more than 38 billion total plays, while learning the pressure and pace of live-service development.

### Operations & Logistics Advisor | The Pickle Servant

Feb 2020 - Nov 2025

- Helped run day-to-day operations for a small food business, including stock, production flow, logistics, and practical problem solving.
- Led a sustainability bottle-swap scheme that encouraged repeat customers and supported the business's reuse goals.
- Assisted with marketing, accounting, and planning, while providing trusted support to managers and team leaders.

EXPERIENCE CONTINUED

Kitchen Hand | Olive Restaurant, Wellington

Apr 2022 - Aug 2022

- Assisted chefs with prep, cleaning, and kitchen operations in a fast-paced restaurant environment.
- Maintained food safety, sanitation, and work-area standards while supporting team leaders during busy service.

Motorcycle Delivery Driver | Hell Pizza

Sep 2022 - Feb 2023

- Delivered orders safely and efficiently, while keeping a strong record of positive customer feedback.
- Helped with kitchen preparation and cleaning between deliveries, and was trusted with company motorcycles due to safe, reliable driving.

EDUCATION

Bachelor of Science - Software Engineering and Computer Science

University of Otago | Graduated Nov 2025

Wellington College | 2018 - 2022

- NCEA Levels 1-3, Excellence Endorsed
- Otago University New Frontiers Entrance Scholarship
- Year 13 Wellington College Top of NCEA General Science Award

ACHIEVEMENTS

- Member of Software Innovation New Zealand
- Under 65kg Wellington College Rugby Captain
- Wellington College Rowing Club - Maadi Cup Squad
- Senior Mentor for Year 9 Students (2022)
- Co-Leader of Wellington College Community Pages (2022)

PROJECTS & LEARNING

- Developed group software projects including a flat management tool, a non-destructive image editor, and an AI fracture recognition application.
- Built an original video game project covering art, design, programming, and overall product direction.
- Completed the 2025 AI Hackathon at the University of Otago.
- Studied and practised databases, assembly programming, networking, router/firewall configuration, security protocols, and the software development lifecycle.
- Comfortable learning new frameworks, tools, and workflows when a project needs them.
